11B — Deep-Dive Feature Audit: Human Foundation, Psychology, Social Graph & Karma (Part 2 of 5)

Experience Traits (`EXPERIENCE_TRAITS`), Ghost `daoScars`, Dual Unsynced Vow Systems (`daoOath` vs `VOLUNTARY_VOWS`), & The Friendly-Spar Meridian Overdrive Rupture Bug (`MERIDIANS`)

- **Target Codebase**: `JianghuSect 2` (`JS2-v2.6.0` in Google Drive `Js2 new`)
- **Target Audience**: Autonomous AI Developers (**GPT** & **Gemini**)
- **Core Game Philosophy**: **100% Emergent, Self-Consistent Personal Growth**. Scars, vows, meridian breakthroughs, and lived-experience traits must emerge naturally from an NPC's own choices and trials—never firing self-destructive life-or-death meridian ruptures in a friendly spar or maintaining duplicate unsynchronized vow registries!
- **Immutable Rule**: **NEVER modify `js/human_core.js`** (`155:2f9c9dd7`).

---

1. `[HUM-VOW-01]` Split-Brain Between Two Parallel Vow Systems (`npc.daoOath` vs `npc.voluntaryVows`) & Zero Autonomous Swearing (`js/cultivation.js`, `js/cpeco.js`, `js/stats.js`, `js/combat.js`)!

1.1 Two Overlapping Systems That Don't Know Each Other Exist

1. **Legacy `npc.daoOath` (`v3.2.0 PROP-01`)**: Stores `{ id: 'VOW_ABSTAIN_PILLS' | 'VOW_NO_KILL' | 'VEGETARIAN_PACIFIST' | ..., upheld: true }`. Checked in `combat.js:633` (`C.slay`), `ECO.applyPill` (`base`), and `CULT.rate`.
2. **New `npc.voluntaryVows` (`v2.4.0 S07`)**: Stores `{ VOW_NO_MEDICINE, VOW_NO_RETREAT, VOW_ASCETIC_PRECEPT }`. Checked in `ECO.usePill`, `stats.js:664` (`ST.preFight`), `combat.js:341` (`Forbidden Arts`), and `combat.js:505` (`flee`).

1.2 Four Multi-Module Contradictions:

1. **`0%` Autonomous Vow-Taking & `0%` Autonomous Redemption in Natural Simulation**:
    - Neither `swearDaoOath` nor `VOLUNTARY_VOWS.swearVow` is ever invoked by NPC AI (`AI.ACTS` / `COG`)! Ascetic Buddhist monks (`BUDDHA_DHARMA`), Khmer Occultists (`OCCULT_MAGE` whose entire trait trigger `onVowInvoke` at `combat.js:1329` expects an active vow!), and proud Sword/Arena seekers never swear vows on their own—nor do vow-breakers ever walk to `shrine` to perform penance (`redeemVow`)!
2. **Cross-System Pill-Abstinence Blindness (`Forced Self-Sabotage`)**:
    - `ST.preFight` (`stats.js:664`) checks `voluntaryVows.VOW_NO_MEDICINE` while ignoring `daoOath.id === 'VOW_ABSTAIN_PILLS'`.
    - Worse, `CPE.welfareDaily` (`cpeco.js:428`), `CPE.pickPurchase` (`cpeco.js:244`), `CPE.autoUse` (`cpeco.js:389`), `SIM.hourly` auto-heal, and `BN.prepare` (`bottleneck.js:122`) check **NEITHER**, forcing pill-abstaining monks to buy, receive, and swallow pills that immediately shatter their vow!
3. **`COMBAT.leave` (`combat.js:696`) Prematurely Purges `vowBacklash`**:
    - If `vowBacklash` is applied via `ST.addStatus` rather than `ST.applyNamedBuff`, `C.leave` strips it the moment combat ends instead of lasting its full `30`–`1440` tick karma duration.
- **Unified Remediation Blueprint**:
    - Bridge `CULT.isAbstainingMedicine(n)`, `CULT.isBoundNoKill(n)`, and `CULT.isBoundNoRetreat(n)` helper predicates reading **both** `n.daoOath` and `n.voluntaryVows` so legacy saves and `v2.4.0` tests stay `100%` green!
    - Add an autonomous **`A.swearAsceticVow` / `A.redeemBrokenVow`** shrine ritual (`cooldown 90 days`) driven by `discipline`, `integrity`, `values.martialPeak`, and path (`OCCULT_MAGE`, `BUDDHA_DHARMA`, `KARMA_SAMSARA`, `SHADOW_SAMURAI`, `ARENA_GLORY`)!

---

2. [HUM-MERID-02] Critical Tautology & Context Bug in Eight Extraordinary Meridians (js/combat.js:655–659, 753–762 & js/economy.js:874)!

2.1 Verbatim Code Proof (js/combat.js:655–659)

```javascript
if (n.meridians && n.meridians.openedCount > 0 &&
!n.meridians.overdriveUsedInFight && hpFrac(n) < 0.25 && g.CULT &&
g.CULT.MERIDIANS && g.CULT.MERIDIANS.triggerOverdrive) {
  if (E(n, 'personality.courage') >= 55 || E(n, 'personality.aggression') >= 55 ||
n.meridians.autoOverdrive !== false) {
    g.CULT.MERIDIANS.triggerOverdrive(W, n, 36);
```

2.2 Three Severe Logical Bugs in Those 4 Lines:

1. **`n.meridians.autoOverdrive !== false` Evaluates `TRUE` When `autoOverdrive` Is `undefined` (`100%` Tautology!)**:
   - Because `n.meridians` initializes `{ opened: {}, openedCount: 0, overdriveUntil: 0 }` with `autoOverdrive === undefined`, `undefined !== false` is **`true` for every NPC in the game**, rendering `courage >= 55 || aggression >= 55` **100% dead code**! Even a timid, ultra-cautious scholar (`courage = 10, caution = 95`) blows up their meridians!
2. **Fires in Harmless Friendly Spars & Sect Tournaments (`Missing f.serious Check!`)**:
   - Line `655` never checks `f.serious`! In every non-lethal Sect Tournament match (`tourney`, `serious: false`) or duel where a disciple has `>= 1` opened meridian and drops below `25%` HP, they **rupture their Governing Vessel (`MERIDIAN_OVERDRIVE_BACKLASH` at `line 756`: `sev: 2` crippling meridian fracture + `-30%` cultivation speed for 24 hours) over a friendly sparring match**!
3. **Zero Organic Meridian-Opening Progression vs Stage-1 Pill Instant-Unlock**:
   - `EFX_MERIDIAN_STABILIZE` (`economy.js:874`) unlocks meridians even on a Stage-1 novice (`06B`), whereas normal cultivators who reach Stage 3–8 without that specific item have **`0` organic meridian progression**!

- **Exact Fix**:
  - Require **`f && f.serious`** on line `655`, and change line `656` to **`n.meridians.autoOverdrive === true || (n.meridians.autoOverdrive !== false && (E(n, 'personality.courage') >= 55 || E(n, 'personality.aggression') >= 55 || hpFrac(n) < 0.14))`**!

- Allow cultivators at `equivalentStage >= 2` to progressively attune up to `Math.min(8, equivalentStage)` Extraordinary Meridians during `breakthrough` / `paidTraining` / acupuncture (`meridianUnblock`).

---

3. `[HUM-EXP-03]` Trigger Gaps & Cache Bug in `CULT.EXPERIENCE_TRAITS` (`js/combat.js:425`, `js/stats.js:214`, `js/sect.js`)!

1. **`BODYGUARD_INTERCEPT` & Seclusion Protectors Omitted From `EXP_TRAIT_COMPANION_GUARDIAN` (`combat.js:372` vs `425–445`)**:
   - Accidental `LOS_COVER` (`line 372`) calls `recordExperienceEvent(W, blk, 'PROTECTED_SECLUSION_OR_ALLY', ...)`, **but deliberate `BODYGUARD_INTERCEPT` (`lines 425–445`, where a companion/mentor dashes in front of a blade!) and `tickClosedDoorSeclusion` (`protectorId` guarding a secluded breakthrough!) both forgot to call `recordExperienceEvent`**! Wire both!
2. **`EXP_TRAIT_BEAST_COVENANT_CARETAKER` Restricted to `1` Sect Officer (`beastmaster`)**:
   - Currently wired only to `runOfficerJurisdictionSingle('beastmaster')`, starving all other `BEAST_SOVEREIGN` disciples! Also credit `recordExperienceEvent` when any cultivator tames a wild beast (`attemptTameBeast`), heals/feeds a fatigued pet, or fights `10+` battles alongside a high-bond Spirit Beast!
3. **Stale `passiveCacheKey` When Recovering Experience-Trait Trauma (`stats.js:214`)**:
   - `passiveCacheKey` hashes only `n.experienceTraits.length * 0x100000`—ignoring `t.recovered` / `t.penaltyCleared` state changes! Mix `t.id.charCodeAt(10) + (t.recovered ? 7 : 1)` into `ext` and call `STATS.dirty(n)` on recovery!

---

4. `[HUM-SCAR-04]` Ghost `npc.daoScars` Combat Multiplier (`js/stats.js:688`): Inflates `ST.rating` (`Paper Power`) While Granting `0.00%` Stats in Real Combat!

- **Exact Bug (`stats.js:688`)**:
  - `scarMult` (`up to +24% combatPowerBonus`) multiplies `ST.rating(n)` (abstract off-map power), **but is completely absent from `ST.compute`,**

`ST.getBaseFast`, and `COMBAT.strike`! A veteran covered in Dao Scars looks `24%` stronger on paper (`getting sent into deadlier expeditions!`) while receiving **`0%` bonus ATK/MATK/DEF in actual fights**!

- **Exact Fix**: Apply `daoScars` inside the unified `ST.compute` / `ST.getBaseFast` pipeline (`e.g., +atk/+matk/+mdef` alongside each scar's specific elemental/meridian trade-off), and remove the unbacked extra multiplier in `ST.rating` so paper rating and real combat match `1:1`!
