08B — Deep-Dive Feature Audit: Outside-Sect World & Ecology (Part 2 of 6)

Expeditions, Trade Caravans, Midnight Black Market, Tavern Bounty Board, Cross-Sect Espionage/Exchange & the `JS2-v2.6.0` Living Chronicle / Periodic Digest Engine

- **Target Codebase**: `JianghuSect 2` (`JS2-v2.6.0` in Google Drive `Js2 new`)
- **Target Audience**: Autonomous AI Developers (**GPT** & **Gemini**)
- **Core Game Philosophy**: **100% Emergent, Autonomous Xianxia Sandbox**. Expeditions, bounty hunts, caravan escorts, black-market auctions, cross-sect espionage, and tavern rumors must operate through real physical travel, real combat/stealth risk, and autonomous NPC initiative—while the `v2.6.0` Chronicle & Digest report 100% truthful facts without internal/external ledger contamination!
- **Master Roadmap for Category 08 (`08A–08F`)**:
  - `08A`: Macro Geopolitics, 19 Rival Sects, Diplomacy, Vassals, 6 Resource Nodes & Siege Warfare
  - **`08B` (This Document)**: **Expeditions (`OUT-14`), Caravans (`N-06.2`), Midnight Black Market, Tavern Bounties, Exchange/Espionage & `v2.6.0` Living Chronicle / Periodic Digest**
  - `08C`: Secret Realms, 43-Floor Nine-Dao Pagoda, 5-Elemental Realms, 4 Sanctums, Branching Nodes, Micro-Locations & Immortal Tombs
  - `08D`: Wilderness Ecology, Roaming Beast Packs, Taming/Pets/Breeding/Menagerie/Symbiosis & Wild Resource Gathering
  - `08E`: Southern Spirit River Fishing, Spirit Cuisine, Underwater Chests, Wandering Figures, Visitors & Legendary Clue Quests
  - `08F`: Grand Finale — Holistic Overview of the Entire Outside-Sect World & Ecology

---

1. `[EXP-GHOST-01]` Unfixed `OUT-14` Ghost-Clone Expedition Bug (`js/explore.js:8196` vs `js/expedition.js:400`)!

- **Exact Bug (`EX.emergencyTeleportToSect`)**:
  - Consuming an Escape Teleport Talisman/Pill (`EFX_ESCAPE_TELEPORT`) resets `n.away = false` and `n.expId = null` and places `n` back inside the

sect—**without removing `n.id` from `ex.members` or canceling `W.world.expeds` (`ex.done` remains `false`)**!
    - When `W.t >= ex.ret` arrives in `EXPED.hourly`, the orphaned expedition settles using the original `ex.members` list and **awards full materials, stones, and CP to the disciple who fled home days ago**!
- **Exact Fix**: Inside `EX.emergencyTeleportToSect(W, n)`:
    1. Look up `const ex = W.world && W.world.expeds && W.world.expeds.find(e => e && !e.done && (e.id === oldExpId || (Array.isArray(e.members) && e.members.includes(n.id))))`.
    2. Remove `n.id` from `ex.members` (reducing remaining party combat power accordingly). If `ex.members.filter(id => W.byId[id] && !W.byId[id].dead && W.byId[id].away).length === 0`, immediately mark `ex.done = true; ex.settlement = { outcome: 'RETREATED_BY_TELEPORT', loot: 0 }`!

---

2. `[EXP-OPS-02]` Instant `0`-Tick, `100%`-Auto-Win, UI-Locked Execution Across Bounties, Black Market, Caravan Escorts & Espionage (`v3.5.0 PROP-22, 23, 24`)!

Inspecting `test/v350_macro_jianghu_and_alchemy_suite.js:95–140` alongside `js/sect.js` and `js/expedition.js:899` uncovers **four major simulation & realism gaps**:

2. **Tavern Bounty Hunts Auto-Win Instantly With Zero Power Check & Zero NPC Autonomy (`SECT.BOUNTY_BOARD.claimBountyHunt`, `v350:116`)**:
    - Clicking `claimBountyHunt` resolves in **`0` ticks**, never sends the hunter away (`hunter.away` stays `false`), and **never compares `CULT.power(hunter)` against the outlaw's `power`/`stage`** (a Stage-1 novice captures a Stage-5 Blood Outlaw with `100%` certainty and `0` HP loss!).
    - **Autonomous Fix**: Keep synchronous `{ instant: true }` fallback only when `opts.instant` is requested by unit tests; in live play, let **`wildwarden`, `vanguard`, `WANDERING_DAO`, `ARENA_GLORY`, and righteous/wealth-driven disciples (`rank >= 2`)** autonomously pick feasible bounties (`hunterPower >= outlawPower * 0.80`) from `mission_hall` (`board` station!), travel out for `1–2` days, fight a real combat/power check (risking injury on failure!), and claim the Closed-Loop bounty!
2. **Cross-Sect Espionage & Exchange Disciples Have `0%` Detection Risk & `0%` Officer Autonomy (`SECT.EXCHANGE_ESPIONAGE`, `v350:97–105`)**:
    - `runEspionageOperation(W, spy, targetSect, 'STEAL_SUTRA')` succeeds **`100%` unconditionally in `0` minutes**!

- **Emergent Espionage Loop**: Let **`spymaster`** autonomously dispatch high-`stealth`/`MOVEMENT` (`NINPO_SHADOW` / `SHADOW_ASSASSIN`) disciples against hostile rivals (`cooldown 45 days`). Compare `spyStealthScore` (+ `MOVEMENT_STEALTH_RECON` arts from `03D`!) against rival `alertness`:
  - **Success**: Steals a real technique or sabotages enemy barrier (`-20%` siege defense).
  - **Caught (`Failure`)**: Spy is **captured into the rival sect's dungeon** (`attitude -35`, triggers ransom demand or rescue mission!), creating high-stakes Wuxia espionage drama!
- Likewise, let **`envoy`** autonomously send promising Stage 2–4 inner disciples on `dispatchExchangeDisciple` to `'ALLIANCE'` partners (`learning real Grand Dao / allied techniques`).

3. **Midnight Black Market & Trade Caravans (`SECT.CARAVAN_AUCTION`, `v350:124–138` & `N-06.2 expedition.js:899`)**:
   - **Fix `N-06.2` (`expedition.js:899`)**: When the monthly caravan offers a `MANUAL_PATH_*`, align price with item definition (or negotiated `treasurySkill` discount), **credit paid stones into `W.world.resourcePool.stones`**, and replace the blind `35%` coin-flip with `scripture`/`treasury` officer decision scoring (`respecting cashReserve`)!
   - **Autonomous Black Market**: Open `openMidnightBlackMarket` on new-moon nights (`W.day % 30 === 0`); let **`marketmaster` (using Sect surplus above `cashReserve`)**, **wealthy Elders (`using personal n.inv.stones`!)**, and **Rival Sects (`using rivalSect.treasury`!)** bid competitively on rare lots!
   - **Real Caravan Escorts**: Route `escortTradeCaravan` through real `guard`/`vanguard` escorts (`incorporating escortSafetyBonus` 05C`and`CAMP_GUARD -40%`ambush risk`v400`!).

---

3. `[EXP-CHRON-03]` Four Subtle Data-Truthfulness & Wiring Bugs in the `JS2-v2.6.0` Living Chronicle & Periodic Digest!

Cross-auditing `PATCH_IMPLEMENTATION_REPORT_JIANGHUSECT2_V2_6_0.md` and `v260_living_chronicle_and_reporting_suite.js` against the rest of the codebase exposes **four concrete mismatches**:

1. **Internal Death-Inheritance & Confiscations Pollute External `stoneIncome` in `EXPED.computePeriodDigest` (`ai.js:893`, `sect.js` vs `v260` Sec 1.3)!**:
   - `computePeriodDigest` computes External Cashflow (`stoneIncome` / `stoneExpense`) by summing `W.sect.ledger` entries written by `ECO.earn` and `ECO.pay`.

- **Bug**: When an internal disciple dies in `AI.kill` (`js/ai.js:893` — which also deletes `50%` of `n.inv.stones` out of the closed loop!), it calls `ECO.earn(W, halfStones, 'มรดกศิลา...')`—and `SECT.exposeEmbezzle` / `auditOfficerConduct` calls `ECO.earn` for recovered internal embezzlement! `computePeriodDigest` counts both internal recoveries as **External Revenue (รายรับจากภายนอกสำนัก)**!
- **Fix**: Transfer `100%` of `n.inv.stones` on death (`50%` to personal `apprentice`/`spouse` inheritance, `50%` to `W.sect.stones`) tagged `{ internalTransfer: true }` on `W.sect.ledger` so `computePeriodDigest` excludes internal recoveries from external `stoneIncome`!

2. **Post-Increment `c.stage` Thread-ID Split Breaks Breakthrough Storyline Threads (`bottleneck.js:54` vs `cultivation.js` / `ai.js`)!**:
   - While stuck at Stage `2`, `BN.decide` and `BN.daily` emit events with `storyThreadId: 'thread:cult:' + n.id + ':2'`.
   - When `CULT.breakthrough` succeeds, `c.stage` increments from `2` $\to$ `3` *before* completion logs run (`v260:141` passed because the test manually hardcoded `':2'`!). Ensure `CULT.breakthrough` / `A.breakthrough.done` captures `const prevStage = c.stage` **before** incrementing so the climax attaches to `'thread:cult:' + n.id + ':' + prevStage` (`marking it คลี่คลายแล้ว`)! Also unify any `'thread:bt:'` alias in `EXPED.inferStoryThread` to `'thread:cult:'`.
3. **Enum Constant Mismatch (`'ALWAYS_ALERT'` in Docs/UI vs `'ALWAYS_TOAST'` in `v260:274`)**:
   - Verify `EXPED.shouldDeliverToast` and `UI.rLog` `<select>` options accept **both** `'ALWAYS_TOAST'` and `'ALWAYS_ALERT'` as equivalent aliases so selecting the option in UI never silently breaks critical raid/death alerts!
4. **Tavern Rumors (`epistemicStatus === 'RUMOR'`) Disconnected From Autonomous Scout Verification**:
   - Allow `scout` / `spymaster` / `WANDERING_DAO` disciples to investigate active `'RUMOR'` chronicles (`resolving them into either a real discovered Secret Realm/Clue or exposing a false rumor / bandit ambush`)!

---

4. Mandatory Verification Suite Additions (`08B`)

1. **Teleport Expedition Cancellation Test (`OUT-14`)**: Start a 1-member expedition, invoke `EX.emergencyTeleportToSect(W, npc)`, advance `W.t = ex.ret`, run `EXPED.hourly(W)`, and assert `0` loot is granted.
2. **Digest Internal-Inheritance Exclusion Test**: Have an NPC with `200` `inv.stones` die via `AI.kill`, run `EXPED.computePeriodDigest(W, { windowDays: 7 })`, and

assert external `stoneIncome === 0` while total stones (`W.sect.stones + sum(npc.inv.stones)`) are 100% conserved!

3. **Live `CULT.breakthrough` Storyline Thread Resolution Test**: Run `BN.decide` at Stage 2, then execute actual `CULT.breakthrough` (`2 -> 3`), and assert `EXPED.getStoryThreads(W, 'thread:cult:' + npc.id + ':2')[0]` contains both events and resolves cleanly.
