07D — Deep-Dive Feature Audit: Sect Governance & Internal Ecosystem (Part 4 of 5)

Internal Politics, 4 Elder Cliques, 5 Sect Charters, 6-Officer Strategic Council, Discipline Hall Tribunal, Dungeon Prisoners, 3-Gen Clan Dynasty, Succession & Faction Mutinies

- **Target Codebase**: `JianghuSect 2` (`JS2-v2.6.0` in Google Drive `Js2 new`)
- **Target Audience**: Autonomous AI Developers (**GPT** & **Gemini**)
- **Core Game Philosophy**: **100% Emergent, Autonomous Xianxia Sandbox**. Political charters, council debates, criminal detentions, prisoner interrogations, generational births, succession duels, and splinter rebellions must unfold organically from NPC traits, power balances, and closed-loop world resources—without freezing behind UI buttons or letting convicted prisoners stroll freely around the Tea Garden!
- **Master Roadmap for Category 07 (`07A–07E`)**:
  - `07A`: Leadership, 6 Directorates & 25 Official Posts, Jurisdictions, Stipends & Censor Audits
  - `07B`: The 8 Sacred Peaks (`SECT.PEAKS`), 144 Peak Campus Stations, Peak Vaults & Peak-Lord Autonomy
  - `07C`: Sect Buildings, Dormitory Caps, Feng Shui, Leylines, Elemental Barrier, Totems & Shrines
  - **`07D` (This Document)**: **Internal Politics, 4 Elder Cliques, 5 Sect Charters (`CHARTER_DOCTRINE`), Strategic Council (`STRATEGIC_COUNCIL`), Outposts (`OUTPOSTS_LOGISTICS`), Tribunal (`TRIBUNAL`), Dungeon (`dungeon`), Clan Dynasty (`DYNASTY_BLOODLINE`), Succession & Mutiny (`FACTION_MUTINY`)**
  - `07E`: Grand Finale — Holistic Overview of the Entire Living Sect Ecosystem

---

0. Hard Architectural Invariants

1. **NEVER modify `js/human_core.js`** (`HC.FINGERPRINT === '155:2f9c9dd7'`).
2. **Preserve `v310–v400` Test Contracts**: All explicit API calls (`enactSectCharter`, `conveneCouncil`, `adjudicateCase`, `resolveFactionSchism`, `spawnCompanionOffspring`, `dispatchSupplyConvoy`) must keep their exact return shapes while gaining real autonomous triggers and physical state enforcement!

---

1. [POL-TRIB-01] Paper-Tiger Courtroom Bug in SECT.TRIBUNAL (v330:145): Convicted Prisoners Sentenced to SEVERE_DUNGEON_DETENTION Walk Around Free as Birds!

- **Locations**: `js/sect.js` (`SECT.TRIBUNAL.adjudicateCase`), `test/v330_living_sect_and_daily_loop_suite.js:144–146` vs `js/ai.js`, `js/sim.js`, `js/cpeco.js:441`, `test/v214_governance.js:49`
- **Verified Split-Variable Bug**:
  1. In `SECT.TRIBUNAL.adjudicateCase(..., 'SEVERE_DUNGEON_DETENTION')` (`v330:145`), the sentence sets **`offender.detainedUntilDay = W.day + days`**.
  2. **Yet the entire simulation engine (`AI.step`, `SECT.governanceSummary`, `CPE.welfareOfficer`, `EXPED.depart`) checks `n.jail > W.t` (in simulation minutes `W.t`!)—NEVER `n.detainedUntilDay > W.day`!**
  3. **Absurd Consequence**: A corrupt Elder or violent bully sentenced to `"Severe Dungeon Detention"` immediately walks out of `discipline`, drinks tea at `tea_garden`, shops at `market`, and continues exercising full Elder authority while supposedly locked in a dungeon cell (`cell` station in `discipline world_map.js:99`)!
- **Two-Part Fix**:
  1. When `SEVERE_DUNGEON_DETENTION` is handed down, set **both** `offender.detainedUntilDay = W.day + days` (preserving `v330:146`) **AND** `offender.jail = W.t + days * 1440` (physically moving `offender` to a `'cell'` station inside `discipline` and suspending their `post` authority until `W.t >= offender.jail`)!
  2. Wire **4 real emergent crime triggers** into `SECT.TRIBUNAL.fileCase`:
     - `PILFER_SUPPLIES`: Greedy, starving, or low-integrity (`integrity < 30`) disciples caught pilfering `stock` / `pills`.
     - `BULLY_DISCIPLE`: Aggressive (`aggression > 78, righteousness < 35`) seniors injuring lower-rank juniors in non-consensual bullying.
     - `FACTION_CORRUPTION`: Escalated from corroborated `W.sect.petitions` (`07A`) or `auditOfficerConduct`.
     - `VOW_DESERTION`: Appointed `guard`/`vanguard` officers who flee (`fled === true`) during a sect defense raid while allies fall!

---

2. [POL-DUNG-02] Three Live Bugs in W.sect.dungeon Prisoner Management (N-01, N-09 & Closed-Loop Ransom!)

2. **RECRUIT_DEFECTOR Spawns Chimera-Corrupted Disciples (N-01 in v2.3.0 Audit, js/sect.js:6965–6971)**:
    - SIM.addNpc rolls a random path/subpath/mantra and 6–7 random techniques, then line 6970 overwrites **only newNpc.cult.path = pris.path**! The recruited defector ends up on XIAN holding a CHRONO_EPOCH mantra and 6 techniques from 6 foreign paths!
    - **Fix**: Pass { path: pris.path, sub: pris.sub } directly into SIM.addNpc (or run full path initialization: pick valid sub from CULT.PATHS[pris.path].subPaths, CULT.bestMantra, CULT.initTrack, CULT.ensurePathGauge, and populate techs strictly from pris.techs / pris.path)!
2. **INTERROGATE Conjures allTechs[0] or Stage-7 Mythic Arts From Stage-1 Bandits (N-09, js/sect.js:6950–6958)**:
    - allTechs.find(...) || allTechs[0] ignores pris.path and pris.stage, extracting unrelated database techniques!
    - **Fix**: Filter candidate techniques strictly to t.path === pris.path && (t.reqTier || t.tier) <= (pris.stage || 2) + 1 && !t.innateOnly && !W.sect.library.includes(t.id) (preferring pris.techs); if the sect already owns all techniques the prisoner knows, yield **Rival Sect Defense / Leyline Intelligence (W.threat.earlyWarningBonus + node garrison intel)** instead of allTechs[0]!
3. **Closed-Loop Ransom Settlement (RANSOM)**:
    - Deduct ransom stones directly from homeSect.treasury (capped at homeSect.treasury if a real rival sect, or W.world.resourcePool.stones if outlaw syndicate). If a rival sect is bankrupt or hostile (attitude < -60), they may **refuse ransom** and launch a **Prison-Break Raid** (tested against W.sect.dungeonSecurity!)!

---

3. [POL-AUTO-03] Six Major Political, Dynasty & Frontier Systems Frozen Behind UI Buttons (0% Autonomous Execution in Natural Play)!

In a pure emergent simulation where the player never clicks command buttons, **six entire flagship systems remain frozen or unresolved**:

1. **Multi-Generational Clan Births (`SECT.spawnCompanionOffspring`, `v360` Phase 3 — `0` Natural Births!)**:
    - `SECT.spawnCompanionOffspring` supports 3-generation family trees (`Gen 1 -> Gen 2 -> Gen 3`), `grandparentIds`, `+30% familyTechLearnBonus`, and Mythic Chimera Bloodline mutations (`MYTHIC_SOLAR_HEAVEN_EYE`, `MYTHIC_DRAGON_PHOENIX_SOVEREIGN`)—**yet married couples (`spouse === 'คู่ครอง'` in `ai.js:758`) NEVER invoke it!**
    - **Fix**: In `SIM.monthly`, for married, co-residing (`!away, !dead, !exiled`) opposite-sex couples of reproductive vitality (`housingCapacity` available, `<= 2` children per couple, cooldown `360` days), roll an organic birth/coming-of-age event calling `SECT.spawnCompanionOffspring`—turning multi-century saves into living multi-generational Wuxia clans!
2. **Sect Charter Doctrine (`SECT.CHARTER_DOCTRINE.enactSectCharter`, `v400` Phase 3)**:
    - Locked at `'CHARTER_MERITOCRACY'` forever unless clicked, **and lacks a cooldown** (allowing 50-stone spam; also verify 50-stone ceremony credits `W.world.resourcePool.stones`)!
    - **Fix**: When a **new Sect Master** takes office (or every 2 years if ideology diverges strongly), let `SECT.masterDecision` enact the Charter matching the Master's dominant `Human Core` values (`commerce -> CHARTER_OPEN_MERCHANT`, `scholar -> CHARTER_SCHOLASTIC_DAO`, `empathy/loyalty -> CHARTER_BROTHERHOOD_SANCTUARY`, `solitude/secrecy -> CHARTER_RECLUSIVE_HERMIT`, `martialPeak -> CHARTER_MERITOCRACY`) with a 180-day cooldown!
3. **6-Officer Strategic Council (`SECT.STRATEGIC_COUNCIL`, `v400` Phase 4)**:
    - Auto-convene seasonally (`every 90 days`) when ≥ 3 Council offices are filled, letting the 6 Grand Officers + Sect Master vote on `FORTIFY_LOGISTICS`, `DIPLOMATIC_OFFENSIVE`, or `GRAND_WAR_DRILL` based on active threat/shortage scores!
4. **Pending Mutiny & Defector Ultimatums (`FACTION_MUTINY` & `resolveDefectorUltimatum`, `v350` & `v330`)**:
    - Auto-resolve pending `activeSchismCrisis` and `activePursuitUltimatum` after a 2-day grace window via the Sect Master's `Human Core` personality!
    - **Crucial Fix in `SEAL_DUEL` (`v350:55`) & `SPLINTER` (`v350:59`)**:
        - In `SEAL_DUEL`, run a **real `CULT.power` / `simulateAssemblyBout` duel** between the Sect Master and Rebel Ringleader (`only defaulting to Master win when opts.forceMasterWin` or Master is genuinely stronger!)—if the Rebel wins, **they legitimately seize `W.sect.masterId` and reshape sect policy**!
        - In `SPLINTER`, actually **remove the rebel ringleader and their low-loyalty (`loyalty < 30`) clique followers from `W.npcs` (`marking defectedToSectId = splinterSect.id`)** so rebels don't stay inside the player's sect eating free food after founding a rival splinter sect!

5. **Frontier Outposts & `'P:BASIC_HEAL_1'` Ghost Key (`SECT.OUTPOSTS_LOGISTICS`, `v400:50, 79`)**:
    - Look at `v400:50 & 79`: `OUTPOSTS_LOGISTICS` uses `'P:BASIC_HEAL_1'`—**a nonexistent pill ID** (real basic HP pill in `data_cp.js` is **`'P:BASIC_HP'`**)! Accept explicit `opts.pillKey` (keeping `v400:79` passing!) while defaulting autonomous supply convoys (`dispatched by quartermaster / vanguard` when `outpost.grainStock < 15`) to real `'P:BASIC_HP'` / `'P:BASIC_WOUND'`!
6. **Immortal Tomb & World Crisis (`v360` Phases 1–2)**:
    - Let high-stage expedition parties (`stage >= 6`) autonomously discover and excavate `IMMORTAL_TOMB` layers with real skill/combat checks, and let the Sect Master + Elder Council choose stances during `WORLD_CRISIS` chapters!

---

4. Mandatory Verification Suite Additions (`07D`)

1. **Physical Jail Enforcement on `SEVERE_DUNGEON_DETENTION` Test**: Sentence an offender via `TRIBUNAL.adjudicateCase(..., 'SEVERE_DUNGEON_DETENTION')` and assert `offender.jail > W.t` prevents `AI.step` from picking leisure/shopping actions.
2. **Clean `RECRUIT_DEFECTOR` & `INTERROGATE` Test**: Recruit a `CHRONO_EPOCH` prisoner and assert `0` foreign-path techniques/mantras; interrogate a Stage-2 `BODY` prisoner and assert any learned technique is `BODY` and `tier <= 3`.
3. **Organic Clan Dynasty Birth & Real `SPLINTER` Departure Test**: Simulate married couples producing Gen-2 offspring via `SIM.monthly`, and verify `resolveFactionSchism(W, 'SPLINTER')` transfers rebel members out of active sect membership into `splinterSect`.
